Summary

Highly motivated React Frontend Developer with 3+ years of experience building scalable, high-performance web applications. Proven track record of optimizing application performance, reducing codebase complexity, and improving cross-browser compatibility. Strong expertise in React.js, Next.js, TypeScript, and modern frontend tooling. Passionate about creating exceptional user experiences and solving complex technical challenges in collaborative, fast-paced environments. Skilled in translating UI/UX design into clean, maintainable code and enhancing application performance in both SSR and SPA setups.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
Frameworks & Libraries: React.js, Next.js, Redux Toolkit, React Hooks, Context API, Tailwind CSS
Tools & Technologies: Webpack, Git, REST APIs, Responsive Design, Cross-browser Testing, Performance Enhancement
Development Practices: Agile/Scrum, Code Review, Component-Driven Development, Debugging, Testing

Experience

Codewave Technology **July 2024 – Present**
Frontend Next.js Developer *Bengaluru, Karnataka, India*

- Develop and maintain production-grade Next.js applications, implementing server-side rendering and static site generation for improved SEO and performance
- Manage and enhance existing projects, ensuring code quality through peer reviews and adherence to best practices
- Collaborate with cross-functional teams to deliver features on schedule while maintaining high development standards
- Leverage Next.js 14+ features including App Router, Server Components, and API Routes for optimized web experiences

Snaxsmart **June 2022 – July 2024**
Frontend Developer *Bengaluru, Karnataka, India*

- Developed 5+ responsive, customer-facing websites using React.js, Redux Toolkit, and Tailwind CSS, compiled with Webpack for optimized bundle sizes and fast load times
- Reduced page load times by 20% by identifying and resolving critical performance bottlenecks in the application's rendering process through React profiling and code optimization
- Decreased reported layout bugs by 18% through implementation of comprehensive cross-browser testing and debugging practices, ensuring consistent user experience across Chrome, Firefox, Safari, and Edge
- Collaborated with backend engineers to troubleshoot and resolve data synchronization bugs, ensuring real-time data consistency across the platform
- Developed a React-based inventory management dashboard with modular, reusable components using React Hooks and Context API, achieving a 15% reduction in codebase size
- Partnered with UX team to translate Figma designs into pixel-perfect, functional interfaces with 100% design alignment, improving cross-team workflow efficiency by 22%
- Implemented state management solutions using Redux Toolkit for complex application states, improving maintainability and developer experience

Key Projects

Inventory Management System Dashboard | *React.js, Context API, React Hooks* **2023**

- Built comprehensive dashboard for multi-warehouse inventory tracking with real-time stock updates
- Designed reusable component architecture reducing code duplication and improving maintainability
- Implemented advanced filtering, sorting, and pagination features for efficient data management

Bhimagold E-commerce Platform | *React.js, Redux Toolkit, Tailwind CSS, Webpack* **2025**

- Developed scalable frontend jewellery E-commerce platform and integrated secure payment gateways,
- Streamlined bundle size and implemented lazy loading, resulting in significant performance improvements
- Ensured responsive design and cross-browser compatibility for seamless user experience across devices

Education

Rajiv Gandhi Institute of Technology **Bengaluru, Karnataka, India**
Bachelor of Engineering in Mechanical Engineering *July 2016 – August 2021*

Achievements

- Awarded MVP of the Month for outstanding contribution and performance on the Bhimagold project
- Successfully delivered 5+ production websites with 100% client satisfaction
- Reduced cross-browser compatibility issues by 18% through comprehensive testing practices
- Achieved 15% codebase reduction through implementation of reusable component patterns
